onClick()

Fonts

sans (normal)
serif
monospace

```
<TextView  
    android:text="Hello, world!"  
    android:typeface="sans"  
    android:textSize="20sp"  
>
```

```
<Button  
    android:text="Hi"  
    android:layout_width="wrap_content"  
    android:layout_height="wrap_content"  
    android:textStyle="italic"  
    android:typeface="serif">  
</Button>
```

TableView

```
<TableLayout
  android:layout_width="fill_parent"
  android:layout_height="fill_parent"
  android:stretchColumns="1">
  <TableRow

    android:layout_width="wrap_content"

    android:layout_height="wrap_content">
    <TextView
      android:text="sans:"
      android:layout_marginRight="4px"
      android:textSize="20sp"
    />
    <TextView
      android:text="Hello, world!"
      android:typeface="sans"
      android:textSize="20sp"
    />
  </TableRow>
</TableLayout>
```

Each item in a row starts
a new column

layout_span

```
<EditText  
  android:id="@+id/entry"  
  android:layout_span="3"/>
```

Number of columns a item spans

layout_column

```
<TableRow>  
  <Button  
    android:id="@+id/cancel"  
    android:layout_column="2"  
    android:text="Cancel" />  
  <Button android:id="@+id/ok" android:text="OK" />  
</TableRow>
```

Stretch & Shrink

android:stretchColumns="1"

android:stretchColumns="0,3"

android:shrinkColumns="2"

The Blue Line

```
<View android:layout_height = "2px" android:background = "#0000FF" />
```

ScrollView

<ScrollView

```
xmlns:android="http://schemas.android.com/apk/res/android"
```

```
android:layout_width="fill_parent"
```

```
android:layout_height="wrap_content">
```

```
<TableLayout
```

```
    android:layout_width="fill_parent"
```

```
    android:layout_height="fill_parent"
```

```
    android:stretchColumns="1">
```

```
        <TableRow
```

```
            android:layout_width="wrap_content"
```

```
            android:layout_height="wrap_content">
```

```
        </TableRow>
```

```
    </TableLayout>
```

```
</ScrollView>
```

WebView

Activity

```
import android.app.Activity;
import android.os.Bundle;
import android.webkit.WebView;

public class WebViewExample extends Activity {
    @Override
    public void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.main);
        WebView browser = (WebView) findViewById(R.id.web);
        browser.loadUrl("http://www.eli.sdsu.edu/courses/fall09/cs696/index.html");
    }
}
```

main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:orientation="vertical"
    android:layout_width="fill_parent"
    android:layout_height="fill_parent"
    >
    <WebView android:id="@+id/web"
        android:layout_width="fill_parent"
        android:layout_height="fill_parent"
        />
</LinearLayout>
```

Don't Forget INTERNET Permission

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"
    package="edu.sdsu.cs.whitney"
    android:versionCode="1"
    android:versionName="1.0">
    <application android:icon="@drawable/icon" android:label="@string/app_name">
        <activity android:name=".WebViewExample"
            android:label="@string/app_name">
            <intent-filter>
                <action android:name="android.intent.action.MAIN" />
                <category android:name="android.intent.category.LAUNCHER" />
            </intent-filter>
        </activity>
    </application>
    <uses-sdk android:minSdkVersion="3" />
    <uses-permission android:name="android.permission.INTERNET" />
</manifest>
```

Local Pages

```
browser.loadData("<html><body>Hello</body></html>", "text/html",  
                "UTF-8");
```

Navigation Methods WebView

reload()
goBack()
goForward()
canGoForward()
clearCache()
clearHistory()

Some WebView Features

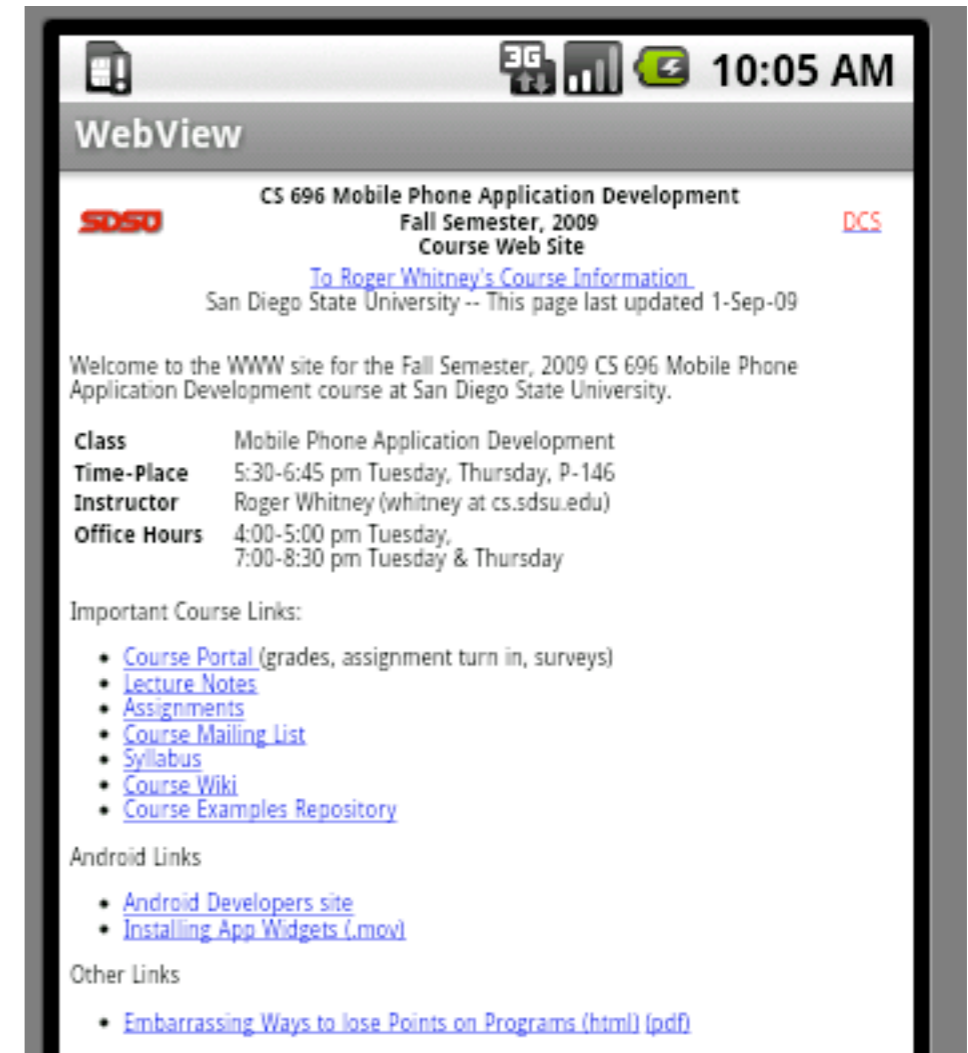

Padding

Builtin Zoom Controls

Settings

JavaScript

InitialScale

WebViewExample

```
public class WebViewExample extends Activity {
    WebSettings viewSettings;
    WebView browser;

    public void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.main);
        takeKeyEvents(true);
        this.browser = (WebView) findViewById(R.id.web);
        this.browser.setPadding(2, 2, 2, 2);
        this.browser.setInitialScale(50);
        this.viewSettings = this.browser.getSettings();
        this.viewSettings.setBuiltInZoomControls(true);
        this.viewSettings.setJavaScriptEnabled(true);
        this.browser
            .loadUrl("http://www.eli.sdsu.edu/courses/fall09/cs696/index.html");
    }
}
```

WebViewExample

```
public boolean onKeyDown(int keyCode, KeyEvent event) {
    if (keyCode == KeyEvent.KEYCODE_S) {
        Toast.makeText(this, this.viewSettings.getUserAgentString(),
            Toast.LENGTH_LONG).show();
        return true;
    } else if (keyCode == KeyEvent.KEYCODE_Z) {
        this.browser.zoomIn();
        return true;
    } else if (keyCode == KeyEvent.KEYCODE_O) {
        this.browser.zoomOut();
        return true;
    }
    return super.onKeyDown(keyCode, event);
}
```

WebViewSettings

Allow file access

User agent

cache mode

font information

Javascript allowed to run

Javascript allowed open windows

Layout algorithm

load images

Enable plugins

Save form data

Save passwords

WebClient

The Activity

```
public class WebViewExample extends Activity {
    private WebView browser;

    public void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.main);
        takeKeyEvents(true);
        this.browser = (WebView) findViewById(R.id.web);
        this.browser.setWebViewClient(new RedirectClient());
        loadTime();
    }

    void loadTime() {
        String page = "<html><body><a href=\"clock\">" + new Date().toString()
            + "</a></body></html>";

        this.browser.loadDataWithBaseURL("x-data://base", page, "text/html",
            "UTF-8", null);
    }
}
```

RedirectClient

```
private class RedirectClient extends WebViewClient {
    public boolean shouldOverrideKeyEvent(WebView view, KeyEvent event) {
        WebViewExample.this.browser
            .loadUrl("http://www.eli.sdsu.edu/courses/fall09/cs696/index.html");
        return true;
    }

    public boolean shouldOverrideUrlLoading(WebView view, String url) {
        Toast.makeText(WebViewExample.this, url, Toast.LENGTH_LONG).show();
        loadTime();
        return true;
    }
}
```

WebViewClient

History

Form resubmission

load resource

Page start

Page finish

Handle errors

Http Authentication request

Scale change

Too many redirects

Key events

Override URL loading

WebChromeClient & Download

Activity

```
public class WebViewExample extends Activity {
    private WebView browser;

    public void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.main);
        takeKeyEvents(true);
        this.browser = (WebView) findViewById(R.id.web);
        WebSettings viewSettings = this.browser.getSettings();
        viewSettings.setBuiltInZoomControls(true);
        viewSettings.setJavaScriptEnabled(true);

        this.browser.setWebChromeClient(new ChromeClient());
        this.browser.setDownloadListener(new DownloadListener() {
            public void onDownloadStart(final String url, String userAgent,
                String contentDisposition, String mimetype,
                long contentLength) {
                Toast.makeText(WebViewExample.this, url, Toast.LENGTH_LONG);
            }
        });
        this.browser
            .loadUrl("http://www.eli.sdsu.edu/courses/fall09/cs696/index.html");
    }
}
```

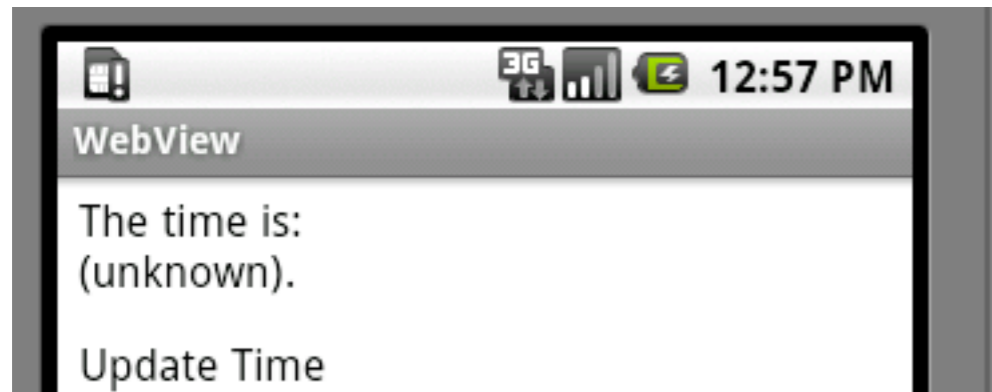

ChromeClient

```
private class ChromeClient extends WebChromeClient {  
    public boolean onJsAlert(WebView view, String url, String message,  
        final JsResult result) {  
        Toast.makeText(WebViewExample.this, "JsAlert", Toast.LENGTH_LONG);  
        return true;  
    };  
}
```

WebChromeClient

onCloseWindow
onCreateWindow
onJsAlert
onJsBeforeUnload
onJsConfirm
onJsPrompt
onProgressChanged
onReceivedIcon
onReceivedTitle
onRequestFocus

addJavaScriptInterface

Activity

```
public class WebViewExample extends Activity {  
  
    private WebView browser;  
  
    @Override  
    public void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        setContentView(R.layout.main);  
        takeKeyEvents(true);  
        this.browser = (WebView) findViewById(R.id.web);  
        WebSettings viewSettings = this.browser.getSettings();  
        viewSettings.setJavaScriptEnabled(true);  
        this.browser.addJavascriptInterface(new SampleJavaCode(), "javaClock");  
        this.browser.loadUrl("file:///android_asset/Sample.html");  
    }  
}
```

SampleJavaCode

```
public class SampleJavaCode {  
    public String time() {  
        return new Date().toString();  
    }  
}
```

assets/Sample.html

```
html>
<head>
<title>Javascript Interface Example</title>
<script language="javascript">
  function getTime() {
    document.getElementById("time").innerHTML=javaClock.time();
  }
</script>
</head>
<body>
<p>
The time is: <br/> <span id="time">(unknown)</span>.

</p>
<p><a onClick="getTime()">Update Time</a></p>
</body>
</html>
```
