# 2D Graphic Options

Draw graphics/animation on Views

- Simple graphics

- Simple animations

Draw on a canvas

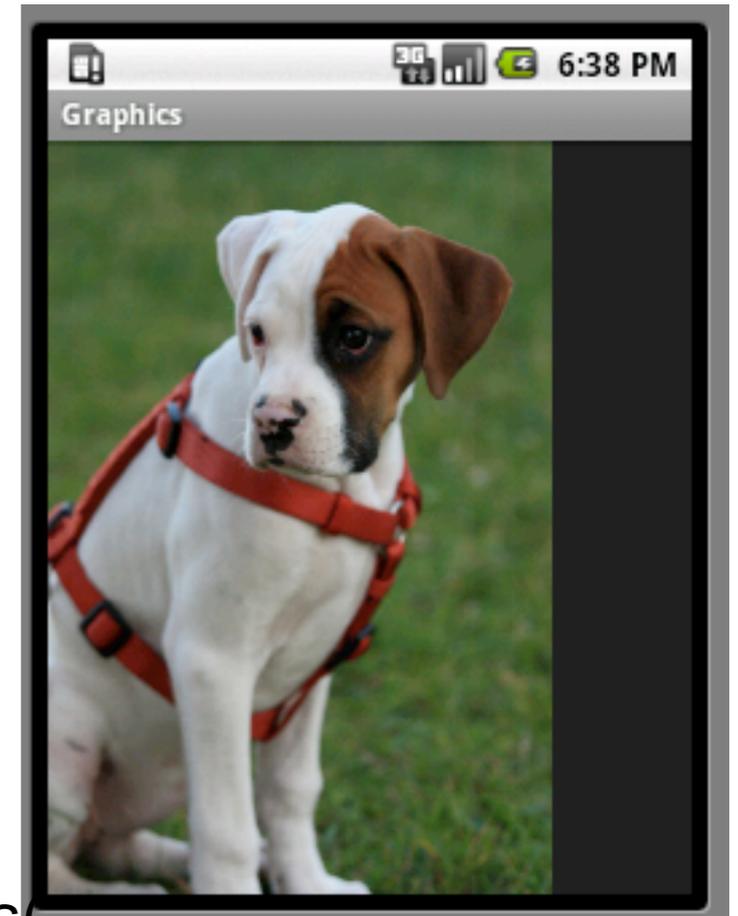

- Graphics need to be redrawn

- Games

Draw graphics/animation on Views

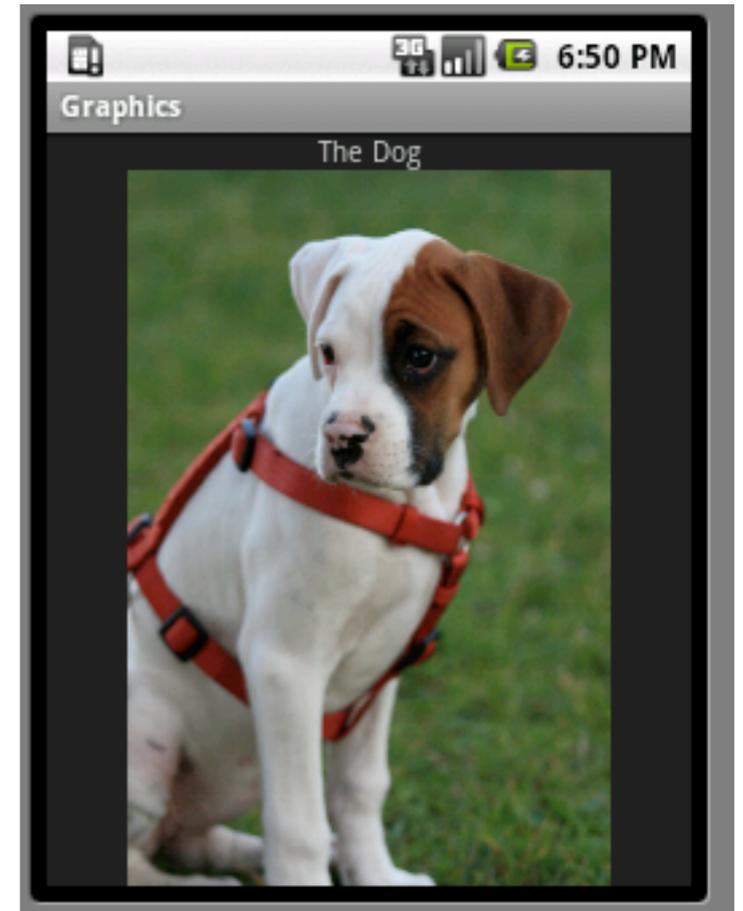

# Display a Drawable

```
public class GraphicsExamples extends Activity {  
  
    public void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        LinearLayout linear = new LinearLayout(this);  
  
        ImageView image = new ImageView(this);  
        image.setImageResource(R.drawable.dog);  
        image.setAdjustViewBounds(true);  
        image.setLayoutParams(new Gallery.LayoutParams(  
            LayoutParams.WRAP_CONTENT, LayoutParams.WRAP_CONTENT));  
  
        linear.addView(image);  
        setContentView(linear);  
    }  
}
```

# Display a Drawable - using XML

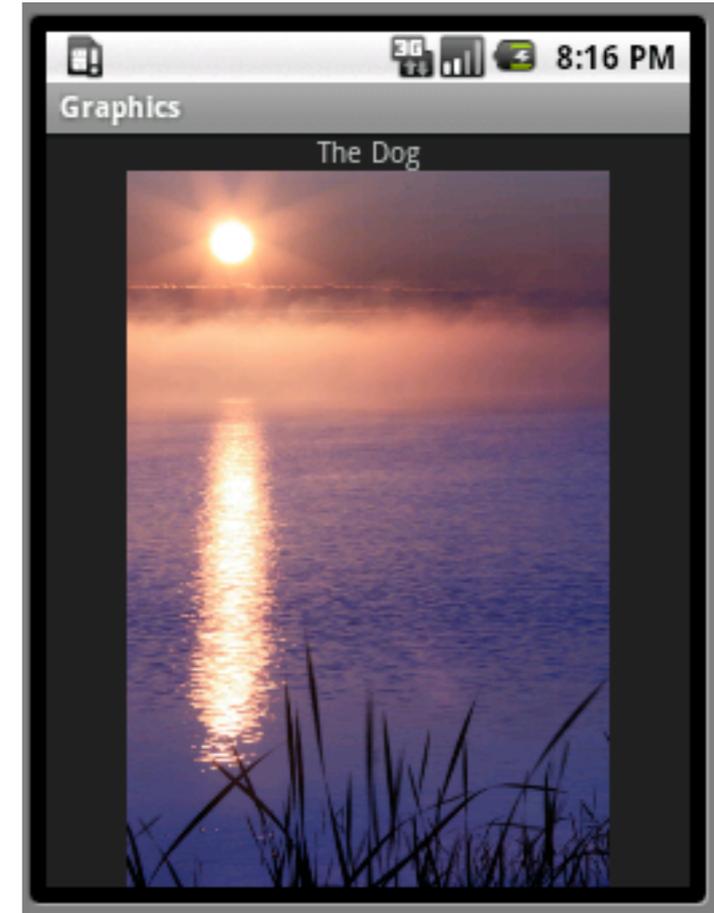

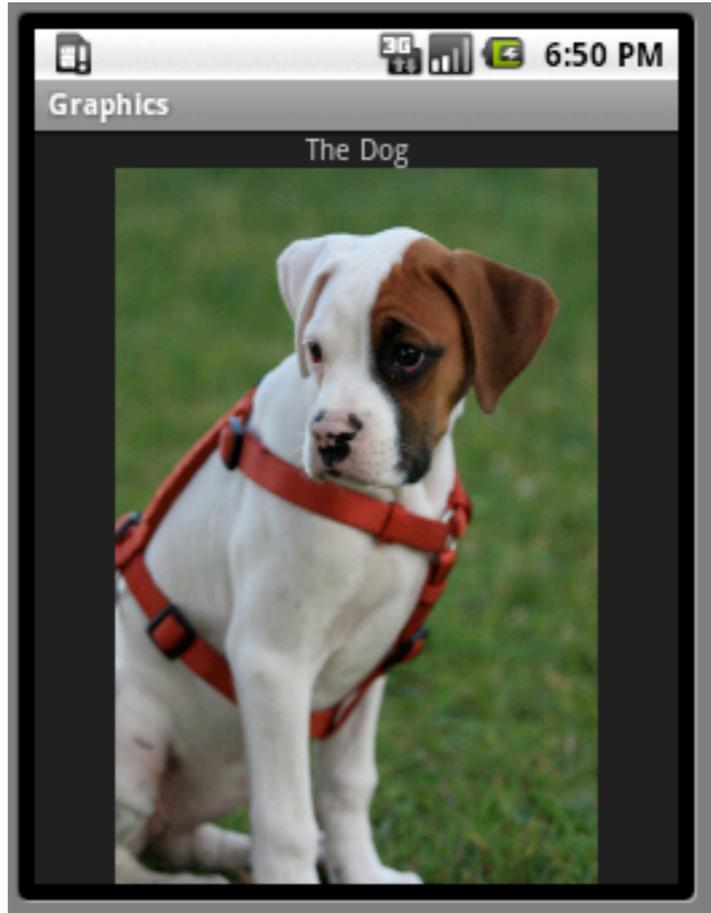

```
public class GraphicsExamples extends Activity {  
  
    public void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        setContentView(R.layout.main);  
    }  
}
```

# main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:orientation="vertical"
    android:layout_width="fill_parent"
    android:layout_height="fill_parent"
    >
<TextView
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:text="The Dog"
    android:layout_gravity="center_horizontal"/>
<ImageView
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:src="@drawable/dog"
    android:layout_gravity="center_horizontal"/>
</LinearLayout>
```

# Transitions

# Activity

```
public class GraphicsExamples extends Activity {  
  
    @Override  
    public void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        setContentView(R.layout.main);  
        Resources resources = this.getResources();  
        TransitionDrawable transition = (TransitionDrawable) resources  
            .getDrawable(R.layout.transition);  
        ImageView image = (ImageView) findViewById(R.id.image);  
        image.setImageDrawable(transition);  
        transition.startTransition(5000);  
    }  
}
```

# layout/transition.xml

```
<transition xmlns:android="http://schemas.android.com/apk/res/android">  
  <item android:drawable="@drawable/dog"/>  
  <item android:drawable="@drawable/fog"/>  
</transition>
```

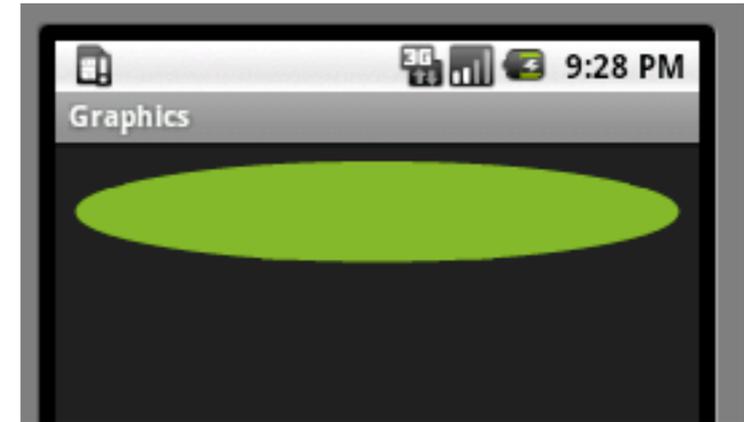

# Background of a View

```
public class GraphicsExamples extends Activity {  
  
    @Override  
    public void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        setContentView(R.layout.main);  
        Resources resources = this.getResources();  
        Drawable dog = resources.getDrawable(R.drawable.dog);  
        View image = findViewById(R.id.simpleView);  
        image.setBackgroundDrawable(dog);  
    }  
}
```

# Drawing an Oval

```
public class GraphicsExamples extends Activity {  
  
    @Override  
    public void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        View shapes = new SimpleDrawing(this);  
        setContentView(shapes);  
    }  
}
```

# SimpleDrawing

```
public class SimpleDrawing extends View {  
    private ShapeDrawable oval;  
  
    public SimpleDrawing(Context context) {  
        super(context);  
        int x = 10;  
        int y = 10;  
        int width = 300;  
        int height = 50;  
  
        this.oval = new ShapeDrawable(new OvalShape());  
        this.oval.getPaint().setColor(0xff74AC23);  
        this.oval.setBounds(x, y, x + width, y + height);  
    }  
}
```

# SimpleDrawing

```
public SimpleDrawing(Context context, AttributeSet attrs) {  
    super(context, attrs);  
}  
  
@Override  
protected void onDraw(Canvas canvas) {  
    this.oval.draw(canvas);  
}  
}
```
