

Assignment 5 - Client Review

You are to review two other students SDChat Clients. I will email you the executable files for each client. For each client answer the following questions. For each client answer the questions in a separate PDF or word document. Each client is identified by a number. Make sure that the client's number is clearly indicated in each document. Do not put your name or Red ID in the document. As you will submit the documents using the course portal I will know who the authored the documents.

1. Can the client work with other clients? If no what problems did you have?
2. Does the client do everything it is supposed to do?
3. What did you think of the UI?
4. Was the text used in buttons, menus, etc understandable and concise?
5. Was the UI protocol oriented or user oriented?
6. Does the client use the config file correctly?
7. Other comments about the client.
8. Rate the client on a scale from 1 to 5, where 1 is worst and 5 is the best

To submit your reviews zip the two documents together and submit the resulting zip file in the course portal.
