

Assignment 1

Due Tuesday Jan 25 at the start of class

Using one of the languages Smalltalk, Java, C#, C++, Ruby or Objective-C explain which class and why you would implement each of the following methods. Answer each independently of the other. You do not have to implement the methods.

- a. A method adds "" to the beginning of a string and "" at the end of the string.
- b. A method that determines if a point is inside of a rectangle.
- c. A method that determines if an integer is odd.
