Assignment 1 part 1  
Calculator CSS  
Due Feb 1 11:59 pm

Using HTML and CSS implement a webpage with an interface for a simple calculator. The calculator has buttons for the digits 0 - 9, the operators "+", "-", "/", and "\*". It also has a "C" button for clear and "=" button to show the results of an operation. The goal of this assignment is to use CSS to make the calculator look like the image below. Your calculator page is to run in a mobile phone browser. The one below is running in an iPhone, but others will work. In later assignments we will make sure it displays and runs on both iPhone and Android phones.

Turning in the Assignment

Put all your files in a single zip file and upload the assignment on the course portal. Do not use a .rar file.
